VESSEL UNDER CONSTRUCTION/EXPECTED DELIVERIES

REMAINING PAYMENTS

Vessel Name	Delivery	Dwt	Price \$m	Extras	Paid to date	Remaining 2018	2019	2020
1	HN 5036	Q1 2020	115,000	51.7	0.0	5.2	5.2	10.3
2	HN 5033	Q4 2019	115,000	51.7	0.0	5.2	5.2	41.4
2	VESSELS UNDER CONSTRUCTION:		230,000	103.4	0.0	10.4	10.3	51.7
66	TOTAL FLEET:		7,158,835					31.0

NOTES TO DATA (November 12, 2018):

Except for any historical information included below, the matters indicated below are forward-looking and involve risks and uncertainties that could cause actual amounts to differ materially from those below.
TEN undertakes no obligation to publicly update any forward-looking statements, whether as a result of new information, future events, or otherwise.

Q3 spot rates on average lower than Q2 for crude carriers, due to poor market and higher voyage costs (mainly due to higher fuel prices).

Vessels engaged on spot voyages accounted for about one quarter of the total fleet.

Off-hire in Q3: 1 vessel in dry-dock.

Andes lost 32 days during Q3 due to dry docking. Artemis lost 20 days and Ajax lost 26 days due to repairs.

Lost days on repositioning voyages: *Silia T*: 6, *Ise Princess*: 11, *Eurochampion 2004*: 5, *Afrodite*: 10, *Selini*: 39, *Salamina*: 14, *Pentathlon*: 9, *Maria Princess*: 7, *Andromeda*: 12, *Aegeas*: 14.

Costs incurred which specifically relate to the dry-dock for survey purposes (i.e. they would not otherwise have been incurred) are deferred, i.e. they are capitalized and amortized over the period to the next survey dry-docking. During dry-docking other costs are often incurred which do not relate to the survey. Such costs are expensed immediately. As a consequence, daily operating costs of a vessel during a quarter in which it undertakes a dry-dock are expected to be approx. 30% higher than usual.

Charters with escalation clauses and adjustments:

Neo Energy's charter rate: \$19,450 until November 14, 2018, then renewed for \$38,000 for 5.5 months.

Maria Energy extended its charter at \$43,000 for one year until end of March 2019. At the end, there are two one year options, the first at \$68,000, the second at \$80,000.

Option rates are not taken into account when calculating the fixed period average.

The time-charter rates for the shuttle-tankers *Rio 2016* and *Brasil 2014* are adjusted periodically to take account of rising expenses. By Q3 they had reached approximately \$51,000 and \$52,000 respectively

Charters with alternative periods / determinable rates

VLCC *Ulysses* is chartered at a rate based on a specific formula for which permission for public disclosure has not been given. Actual TCE rate achieved in Q3 2018 was approx. \$29,500.

Profit sharing arrangements:

For vessels on a monthly profit-share arrangement, the profit-share is based on a commonly accessible index and therefore is determinable at any month end

For vessels on a six-monthly profit-share arrangement, the profit-share is determined on a fixed date, by recalculating the monthly average of the past six monthly actual rates *Spyros K, Dimitris P*),

or as determined by an independent brokers' panel at the end of the six months (*World Harmony, Chantal, Socrates, Selecao, Andes*).

Until the rate has been determined only the minimum rate is accounted for (minimums are shown on the preceding Fleet Data Sheet)

Determination dates: *Spyros K* and *Dimitris P* -30 June and 31 December. *World Harmony* -23 April and 23 October. *Chantal* -10 June and 10 December. *Socrates*-7 July and 7 January. *Selecao*-30 July and 30 January. *Andes* -25 May and 12 September.

Hercules I rate is a minimum world-scale 47.5, maximum 80 based on trade route TD3C plus profit-share 50-50 above on a monthly basis

There is no indication of significant profit-share for Q3, apart from *Hercules I* earning approximately an average \$5,000 daily profit-share

General and administrative expenses (our overhead costs) include:

Management fees - monthly fees are \$27,500 per vessel, \$36,877 for *Neo Energy* and *Maria Energy*, LNG carriers and \$35,000 each for the three shuttle tankers.

Administrative/office costs - audit/legal fees, director fees/expenses, investor relations costs, office supplies, advertising, project costs, D&O insurance, sundry.

Average total expenditure on Administrative/office costs per quarter is approx. \$1.0m.

Management Incentive award is subject to BOD approval. The amount is amortized throughout the year in which it is determined. No award has been granted in 2018

Finance costs: In Q3 expected finance costs are as follows:

	\$m estimate
Loan Interest	18.6
Interest payable in Q3 on all interest rate swaps	0.2
Loan expense amortization, bank charges, other finance costs expensed	0.9
Capitalized interest (2 vessels under construction)	-0.1
Bunker hedges (non-hedging criteria) valuation movements (positive)	1.1
Bunker hedges cash receivable (positive)	-2.6
Total expected finance costs	<u>18.1</u>

Interest and investment income: Interest earned on bank deposits is expected to amount to \$0.9m in Q3.

New deliveries:

In Q2 the Company signed contracts for the building of two Aframax tankers at a cost of \$51.7m each. They will be chartered to US oil major on delivery

Liquidity:

As at September 30, 2018, TEN had approximately \$230m in cash and other liquid assets.

Loan movements in Q3:	\$m
Outstanding debt at June 30, 2018	1,684.3
Scheduled repayments	<u>-49.5</u>
Expected outstanding debt at September 30, 2018	<u>1,634.8</u>

Expected annual loan amortization, based on the current schedule, including recent refinancings and prepayments (in US\$ millions):

	2018	2019	2020	2021
Scheduled repayments	166	158	150	111
Balloons not yet paid	33	93	103	155
Amounts prepaid on sales and on maturity	60	-	-	-
	<u>259</u>	<u>251</u>	<u>253</u>	<u>266</u>

It is expected that all balloons will be refinanced. Refinancing of remaining 2018 balloons has been arranged.

In Q2, time-chartered vessels generated enough cash to cover all expenses, as follows:

	\$m
Revenue generated by vessels on time-charter	84.7
Operating Expenses	44.2
Commission Expenses	4.5
Charter-in hire	2.7
Finance Expenses, cash net interest income	15.1
Overhead expenses	6.8
Total expenses	<u>73.3</u>
Surplus	11.4
Revenue generated by spot vessels after bunker and port expenses	<u>13.9</u>
Total cash generation after expenses	<u>25.3</u>

This is not an indication of what we might expect for Q3, although we do expect that the pattern of time-charter revenue cover over cash expenses will be similar and the contribution from spot vessels reduced.

A dividend of \$0.05 per common share was declared on September 7, 2018 for payment on December 6, 2018.

Preferred and Common Dividends are subject to declaration by the Company's Board of Directors

Dividends on the 8.0% Series B Preferred Shares and the 8 7/8% Series C Preferred Shares are paid quarterly in arrears on the 30th day of January, April, July and October.

Dividends on the 8.75% Series D Preferred Shares are paid quarterly in arrears on the 28th day of February, May, August and November of each year

Dividends on the 9.25% Series E Preferred Shares are paid quarterly in arrears on the 28th day of August, November, February and May of each year.

Dividends on the 9.50% Series F Preferred Shares are paid quarterly in arrears on the 30th day of October, January, April and July of each year.

Preferred dividends, like common stock dividends, do not impact the income statement. However, preferred dividends are included in the calculation of eps. For Q3 therefore, it is expected that an amount of \$10.2m (payments and accruals) will be included in the numerator when calculating eps. This is approx. \$3.5m more than at the end of Q2

Vessel values: We regularly perform cash flow tests to assess whether the estimated future cash flow to be generated by each of our vessels is in excess of the net book value of those vessels. Given current remaining life potential scenarios for vessels, we do not expect there be any impairment charges relating to the vessels in our fleet in Q3.

Minority interest. Amount due from the non-controlling interest in Q3 is expected to be \$0.2m, being net loss attributable to the non-controlling interest which owns 49% of *Maya* and *Inca*.

Leases - charter-in hire \$2.7m per quarter, per vessel.

As part of the December 21, 2017 sale and leaseback arrangement, TEN has sold the suezmaxes, *Eurochampion 2004* and *Euronike*, to a third party and chartered them back on a bare-boat charter for 5 years at \$14,825 per day, per vessel.

There are no repurchase options or purchase obligations and therefore these charters are accounted for as operating leases. These are the only chartered-in vessels in the fleet. There are no other charters considered as capital or finance leases

The implementation of a new accounting standard in 2019 may change the accounting treatment currently used.

Cargo: Although the LR2s and LR1s are designated product carriers, much of their activity during Q3 is for the transportation of crude or fuel oil
